

LONG ISLAND LIGHTING COMPANY

EXECUTIVE OFFICES: 175 EAST OLD COUNTRY ROAD • HICKSVILLE, NEW YORK 11801

May 14, 1990

Mr. Charles E. Fitzsimmons
USEPA Region II
Edison, New Jersey 08837

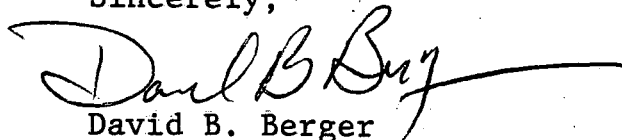

Dear Mr. Fitzsimmons:

LILCO continues to implement the SPCC studies and actions outlined in our most recent correspondence of February 28, 1990. Accordingly, please be advised that the minor maintenance items noted for our E. F. Barrett Power Station were repaired prior to March 31, 1990. This action completes all of the outstanding items for this facility noted in the USEPA SPCC field inspection of September 1989.

Additionally, please find attached a complete list of tanks and their respective ages for our Northport and Port Jefferson Power Stations. This action item is being supplied prior to the planned completion date of June 1, 1990. If there are any questions on this or any of the action items, please contact us at (516) 420-6144.

Our records show that the only remaining action item is a survey of the dike volumes at our Port Jefferson Power Station. This information should be available by October 1, 1990.

Sincerely,

David B. Berger
Senior Environmental Engineer
